Barkey plasmatherm

The Barkey plasmatherm thaws FFP bags and warms blood, erythrocyte concentrates (EC), cryopreserved preparations, cryopreserved stem cells (HPC) and infusion solutions.

Benefits at a glance

- Thaws 4 bags at a time (in case of emergency up to 8)
- Simple and intuitive application
- High standard of hygiene due to dry warming (no direct contact to water)
- Smooth surfaces and rounded edges
- Easy to clean through wipe disinfection
- Electronic documentation (optional)
- 2 leak detection sensors = no risk of contamination or infection
- Shortcuts for plasma, blood, HPC and user program
- Large display with plain text
- Change of water just once a year
- Cushions conform to bags
Barkey plasmatherm

Accessories (optional)
- Electronic documentation software (Ethernet connection only)
- Barcode reader
- Log printer

Hygiene
- No risk of contamination due to dry thawing and warming (no direct contact to water)
- Easy to clean through wipe disinfection
- Corrosion-resistant

Safety
- Electronic and mechanical overtemperature alarm
- Adjustable temperature range from +37°C to +45°C
- Visual and acoustic signal after heating duration is complete or in case of error
- Visual inspection due to clear cushions and lid
- 2 leak detection sensors
